SKILLS

- **Languages:** Python, C, C++, Java
- **Web Technologies:** HTML, CSS, JavaScript
- **Tools/Platforms:** Jupyter Notebook, VS Code, GitHub, MySQL, Microsoft Excel, Power BI
- **Soft Skills:** Problem-Solving, Analytical Thinking, Team Player, Adaptability

PROJECTS

Olympic Data Analysis Dashboard | [GitHub](#): Dec' 25

- Built an interactive Power BI dashboard to analyze athlete participation trends and medal distributions in Olympic Games.
 - Transformed 270,000+ athlete-event records (1896–2016) using Power Query and created analytical measures using DAX.
 - Visualized medal distribution, top-performing countries, and athlete demographics using dynamic charts and slicers.
- Tech:** Power BI, Power Query, DAX, Data Visualization

Hospital Patient Management System | [GitHub](#): Aug' 25

- Designed a console-based system to manage hospital patient records including registration, search, and deletion operations.
 - Implemented priority queue and FIFO queue data structures to handle emergency and normal patient scheduling efficiently.
 - Integrated CSV file handling to store and retrieve patient records and generate basic patient statistics.
- Tech:** Python, Data Structures, CSV File Handling

IPC Crime Data Analysis | [GitHub](#): Apr' 25

- Analyzed district-wise IPC crime dataset to identify crime trends and regional crime patterns across India.
 - Processed 5000+ crime records with 120+ variables using Python, Pandas, and NumPy and generated visualizations using Matplotlib and Seaborn.
 - Identified high-crime regions and category-wise crime distributions through exploratory data analysis and visualization.
- Tech:** Python, Pandas, NumPy, Matplotlib, Seaborn

TRAINING

ByteXL TechEd Private Limited | [Link](#): Jun' 25 – Jul' 25

Data Structures and Algorithms Training

- Learned fundamental and advanced Data Structures and Algorithms including arrays, linked lists, stacks, queues, trees, graphs, recursion, and sorting techniques.
- Applied problem-solving skills by implementing algorithms and solving coding problems with focus on time and space complexity optimization.
- Developed a Hospital Patient Management System utilizing priority queue and FIFO queue concepts to demonstrate real-world application of data structures.

CERTIFICATES

Master Generative AI & Generative AI tools (ChatGPT & more) | Infosys Springboard | [Link](#) Aug' 25
Cloud Computing | NPTEL Online Certification | [Link](#) May' 25
Data Structures and Algorithms | NeoColab | [Link](#) Dec' 24

ACHIEVEMENTS

Solved 100+ Data Structures and Algorithms problems on LeetCode: Jan' 26 – Mar' 26

Built strong problem-solving ability through consistent practice of core DSA concepts.

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; CGPA: 7.84 Since Aug' 23

Mother's International Academy Madhupur, Jharkhand
Intermediate; Percentage: 75.8% Apr' 20 – Mar' 22

Carmel School Madhupur, Jharkhand
Matriculation; Percentage: 88.17% Apr' 19 – Mar' 20
